

### Geography

We will be looking at the main mountain ranges of the world. We will be studying the physical features of mountains and coasts and investigating the habitats which can be found there.

Classifying the living things which live there will help us link with our Science.

### English

We will begin the term by writing our own information texts and newspaper reports linked to our study of mountains. We will then move on to debating whether we can change our lifestyles in order to help alleviate global warming and natural disasters. We will be writing persuasive letters regarding plastic pollution and global warming.

**Class reads:** *The Elsewhere Emporium, Holes*

### Art

We will be studying famous landscape artists. These will inspire us to create our own masterpieces, using a variety of different materials.

We will be holding an art exhibition to show off our work!

### Computing

We will be looking at how, as a world, we stay connected with each other through wikis, blogs, email and social media. We will continue to teach E-Safety and Cyber-bullying.

### Spanish

Conversations, Café ordering.

Oak Class

# Mountains and coasts

Spring Term 2020

### Science

Through studying animals and their habitats, children will be classifying different living things, using dichotomous keys. They will research the need for classification in science and use this knowledge to create their own organisms.

We will be looking at mammals in greater detail and studying the respiratory and circulatory systems of the human body.

### PE

Through hockey, children will be learning to pass, dribble and shoot. They will also be working on their team building skills.

### MUSIC

We will be appraising a variety of music genres. We will then be using this knowledge to create our own jingles for our websites and adverts.

### Maths

We will return to the 4 operations, looking at how our arithmetic strategies can be used efficiently to answer questions.

We will be spending our Maths lessons investigating different problems. The children will learn methodical strategies to gain the answers and will look at ways to explain their reasoning.

### RE

Leaders in our lives will be studied in RE. We will consider the qualities a leader needs and will think about the type of leader we would like to be!

### PSHE

We will be looking at the different types of responsibilities which both children and adults have and the place they play in society.
